

This letter is to express my concern
the proposed housing development
neighbourhood on Syroid Street.
This project will have a massive
impact on our quiet community
to much street traffic, loud cars
and dangers to the young child
area.

The proposed development is to
our area, as a triplex on a site
unsetting with many local residents.
The increase street traffic, in
population, noise and construction
a negative strain to our community.
This would alter our area by
open space and single family
high density housing complex.
A single family home would be
suitable for our area as a to
character of the surrounding.
I fear for this development to
neighbours agree that this is a
development at the end of our
Furthermore, I strongly urge to
reconsider this proposed housing
as it is NOT the right fit for our
neighbourhood and will cause
negative impact to our community
